

# **GB Electrical ELECTRICAL INSTALLATION CONDITION REPORT**

	(Requirements for Electrical Installations – BS 7671 IET Wiring Regulations)
A. DETAILS OF 1	THE CLIENT OR PERSON ORDERING THE WORK
Name:	
Address:	Greenaways South Hill Avenue Harrow On The Hill HA1 3NU
B. REASON FOR	R PRODUCING THIS REPORT
Landlord electrical safe	ety report
	Date(s) inspection and testing carried out: 02/06/2015
C. DETAILS OF	THE INSTALLATION WHICH IS THE SUBJECT OF THIS REPORT
Occupier:	
Address: Green	aways South Hill Avenue Harrow On The Hill HA1 3NU
Description of premis	ses:    Variable   Domestic   N/A   Commercial   N/A   Industrial   N/A   Other, please specify :   N/A   N/A
Estimated age of the	wiring system  20 Years Evidence of additions or alterations N/A Yes V No N/V Not apparent
Installation records a (Regulation 621.1)	No No Date of last inspection N/A If yes, estimated age N/A years
D. EXTENT AND	LIMITATIONS OF INSPECTION AND TESTING  The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671:2008 as amended
Extent of the electric	cal installation covered by this report Earthing, lighting and power circuit only
	cluding the reasons, see Regulations 634.2
No inspection of conce	ealed cables.
Limitations agreed	with N/A Position (if applicable) N/A
Operational limitation	ns
including the reason	N/A
	bles concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected between the client and inspector prior to the inspection. An inspection should be made within accessible roof space housing other electrical equipment.
E. SUMMARY O	F THE CONDITION OF THE INSTALLATION
General condition the installation (in terms of electrical s	Good
Overall assessment	t of the installation in terms of its suitability for continued use:
An unsatisfactory	assessment indicates that dangerous (code C1) and/or potentially dangerous (code C2) conditions have been identified
N/A Alternative	source of supply (as described in attached schedule if applicable)

### F. RECOMMENDATIONS

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as UNSATISFACTORY, I/we recommend that any observations classified as 'Danger present' (Code C1) or 'Potentially dangerous' (Code C2) are acted upon as a matter of urgency. Investigation without delay is recommended for observations identified as 'Further investigation required' (FI) Observations classified as 'improvement recommended' (Code C3) should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by

01/06/2020

### **G. DECLARATION**

I/We, being the person(s) responsible for the inspection and testing of the electrical installation (as indicated by my/our signature(s) below), particulars of which are described above, having exercised reasonable skill and care when carrying out the inspection and testing, hereby declare that the information in this report, including the observations and the attached schedules, provides an accurate assessment of the condition of the electrical installation taking into account the stated extent and limitations in section D of this report.

INSPECTED AND	TESTED BY:		REPORT AUTHOR	ISED FOR ISSUE BY:

N. IN	SPECTION SCHEDULE FOR A DISTRIBUTION BOARD INSTALLATION							
OUTCO	MES: Acceptable Condition   Unacceptable condition – Improvement recommended – State C3  Not Verified: NV Further investigation: FI	Limitation: LIM	Not Applicable: N/A					
ITEM	DESCRIPTION	OUTCOME  (Use codes above. Provide additional comment where appropriate. C1, C2, C3 and FI coded items to be recorded in Section K of the Condition Report)						
5.17	7 Termination of cables at enclosures – indicate extent of sampling in Section D of the report (Section 526)							
*	Connections soundly made and under no undue strain (526.6)	١	<b>1/V</b>					
*	No basic insulation of a conductor visible outside enclosure (526.8)		<b>✓</b>					
*	Connections of live conductors adequately enclosed (526.5)		<b>✓</b>					
*	Adequately connected at the point of entry to enclosure (glands, bushes etc) (522.8.5)		<b>✓</b>					
5.18	Condition of accessories including socket-outlets, switches and joint boxes (621.2 (iii))		<b>✓</b>					
5.19	Suitability of accessories for external influences (512.2)		<b>✓</b>					
5.20	Adequacy of working space/accessibility to equipment (132.12; 513.1)		<b>√</b>					
5.21	Single-pole switching or protective devices in line conductors only (132.14.1, 530.3.2)		<b>√</b>					
6.0	LOCATION(S) CONTAINING A BATH OR SHOWER							
6.1	Additional protection for all low voltage (LV) circuits by RCD not exceeding 30 mA (701.411.3.3)	N	I/A					
6.2	Where used as a protective measure, requirements for SELV or PELV met (701.414.4.5)	N	J/A					
6.3	Shaver sockets comply with BS EN 61558-2-5 or BS 3535 (701.512.3)							
6.4	Presence of supplementary bonding conductors unless not required by BS 7671:2008 (701.415.2)							
6.5	Low voltage (e.g. 230 volt) socket-outlets sited at least 3 m from zone 1 (701.512.3)	N	J/A					
6.6	Suitability of equipment for external influences for installed location in terms of IP rating (701.512.2)							
6.7	Suitability of equipment for installation in a particular zone (701.512.3)							
6.8	Suitability of current-using equipment for particular position within the location (701.55)							
7.0	OTHER PART 7 SPECIAL INSTALLATIONS OR LOCATIONS							
,	List all other special installations or locations present, if any (*Record separately the results of particular inspections applied)	,	<b>✓</b>					

*Special installations or loca	ations present, if any.   I	Details of circuits and	or installed equipment	t vulnerable to damage	when testing and	/or remarks

## CONDITION REPORT GUIDANCE FOR RECIPIENTS

(to be appended to the report)

This report is an important and valuable document which should be retained for future reference

- 1 The purpose of this Condition Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger (see Section K).
- 2 The person ordering the Report should have received the "original" Report and the inspector should have retained a duplicate.
- 3 The Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.
- 4 Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested quarterly. For safety reasons it is important that this instruction is followed.
- 5 Section D (Extent and Limitations) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
- 6 Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.
- 7 For items classified in Section K as C1 ("Danger present"), the safety of those using the installation is at risk, and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work immediately.
- 8 For items classified in Section K as C2 ("Potentially dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.
- 9 Where it has been stated in Section K that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated without delay. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).
- 10 For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit/distribution board.ommended that a competent person undertakes the necessary remedial work immediately.
